AppFire

...makes your stove “smart”!

Your pellet stove controlled from smart device **via App**

For all users wishing to manage their pellet stove / boiler directly
from their smartphone, even **from remote**.

- ✓ Intuitive and simple: the domestic heating has never been so easy to manage!
- ✓ **Easy setting** with a step-by-step procedure. No need for the user manual.
- ✓ **AppFire is free** for Android / iOS tablet and smartphone

How it works

1

Download the free **AppFire** from AppStore or Google Play, or frame the QR-Code reported above.

2

Connect the **WiFire module** to the electronic board of the stove following the instructions.

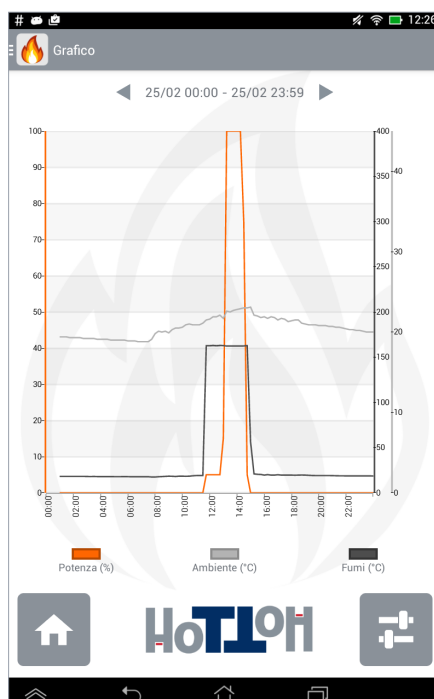

3

Open **AppFire** and follow the setting procedure for the Wi-Fi connection. **Done!** Your stove is now smart!

Operations: temperature setting, activation/ deactivation of the ECO STOP function

Charts: stove operating state, temperature flow (exhaust, environment, water) and alarms.

Alarms: defective functioning, pellet depletion.
